

The Teyetan is a complete mobile solution that can run any of the ECS Software suites. It is a self-contained and fanless form factor that allows for immediate setup in the harshest of environments.

- Two configurations
 - Touchscreen Teyetan Console
 - Teyetan Mini with carry handle
 - (Both configurations can be mounted directly to a machine frame or a mobile cart)*
- Support for all ECS software modules
 - Process Monitoring
 - Event Capture
 - Process Fault Detection
 - Web Inspection
- Wireless control and review
- Touch Screen V12 Software with our LSP module *(Live, Stop and Play)*
- Battery backup options
- Options for speed and trigger input and also alarm output
- Synchronize cameras to see multiple views of the same defect
- Dustless and fanless with IP 65 rating
- Supports a wide selection of GigE compliant cameras and can process up to four cameras per unit
- Optional 316 stainless steel collapsible cart that fits under most conveyor belts

The Teyetan mobile configurations are the most effective tools on the market today to increase you machine OEE (Overall Equipment Effectiveness).
